Experience

Data Systems Analyst / Migration Engineer

March 2025 – Present

CGI Federal, Fairfax, VA

- Serve as technical liaison between government stakeholders and development teams, gathering and translating reporting requirements from DoD's Office of the Secretary of Defense (OSD) Defense Pricing and Contracting (DPC) organization into technical specifications, sourcing data from federal procurement data systems
- Perform end-to-end code review of ETL pipelines, including QVD extraction scripts and report load scripts, mapping data lineage from source systems through Qlik-hosted applications to validate transformation logic and field-level accuracy
- Write SQL queries in Databricks to independently validate data integrity across the pipeline, from raw source data in Advana's War Data Platform (S3-based) through to final report output
- Lead User Acceptance Testing (UAT) cycles, compiling findings reports and presenting validation results directly to government stakeholders to secure sign-off prior to production deployment
- Lead data migration efforts for Qlik reporting applications, coordinating production deployments alongside development teams to migrate validated reports into live environments and manage post-deployment verification

Technology Assurance Associate, Federal

May 2023 – March 2025

KPMG LLP, Tysons Corner, VA

- Conducted federal IT audits, evaluating compliance with DFARS 252.204-7012, NIST SP 800-53, and RMF controls to safeguard Controlled Unclassified Information (CUI) and maintain DoD cybersecurity standards • Assessed IT infrastructure integrity, implementing risk management strategies that improved compliance metrics across 16+ government and commercial agencies
- Led 50+ client-facing walkthrough meetings to analyze database structure, access management, and user provisioning, reducing audit findings and enhancing client readiness
- Audited Privileged Access Management (PAM) policies under M-22-09 of the Federal Zero Trust Strategy, aligning with NIST enterprise patch management guidelines to mitigate system vulnerabilities effectively • Designed automation routines using Python and Alteryx to increase audit efficiency on dozens of client engagements

Customer Success Intern

May 2022 – August 2022

Enhesa Inc. Rosslyn, VA

- Administered Enhesa's client implementation phase by overseeing portal access and administration, managing over 100 current clients and 16 future client opportunities, leading to successful onboarding and high client retention rates • Streamlined internal communications tools for the client-facing team, enhancing efficiency and collaboration within the team

Business Development Intern

May 2021 – August 2021

Kensington Sales Group, Kensington, MD

- Generated leads for 15 clients in the public safety sector by conducting market research and outreach, measured by an increase in potential client engagements and meetings
- Facilitated meetings and communication between potential clients and management team, resulting in stronger client relationships and successful deal closures

Education

B.B.A Computer Information Systems

August 2019 – May 2023

James Madison University Harrisonburg, VA

Active Secret Clearance (U.S. Department of Defense)

March 2024-Present

AWS Certified Solutions Architect Associate (SAA-C03)

January 2025

AWS Certified AI Practitioner (AIF-C01)

February 2025

Projects

AWS AI Chatbot

- Designed and trained an intuitive AI-powered assistant with a user-friendly interface, leveraging Amazon Bedrock, IAM, Lex, and S3 for seamless deployment
- Architected an AI chatbot leveraging Amazon Bedrock and Lex, integrating a custom S3-backed knowledge base and retrieval-augmented generation (RAG) techniques to deliver responsive and contextually relevant answers with an average query time under 2 seconds

AWS Three-Tier Web Application

- Deployed and hosted a scalable and serverless web application using AWS Lambda, DynamoDB, API Gateway, S3, and CloudFront, ensuring high availability and reliability
- Designed and implemented a three-tier architecture with serverless AWS resources, achieving sub-2-second response times and scalability to support up to 10,000 concurrent users

Skills

Advana / War Data Platform (WDP), Agile/Scrum Methodologies, Alteryx, AWS (API Gateway, CloudFront, DynamoDB, IAM, Lambda, QuickSight, RDS, S3, VPC)), Databricks, JIRA, Microsoft Dynamics 365, Oracle RDBMS, Qlik, SharePoint, SQL, Terraform
